Park User Statistics

FISCAL YEAR SUMMARY

Alberta
RECREATION AND PARKS
Provincial Parks Service

PREFACE

This report presents a summary of Park User Statistics for the 1988 / 1989 Fiscal Year. The Park User Statistics reporting structure also includes the production of two other types of documents:

1. The Monthly Camping Statistics Summaries produced throughout the peak season, and;
2. The Peak Season Summary available in approximately January of each year.

With this reporting structure, it is hoped that Park User Statistics are made available at a time appropriate to budget preparation cycles, manpower planning, program planning, monitoring and evaluation.

The Provincial Parks Service of Alberta Recreation and Parks collects four basic types of visitation information:

1. Camping Use Statistics - collected through permit sales, reasonable estimates and camper surveys;
2. Day Use Statistics - collected through Automatic Traffic Counter readings and traffic surveys;
3. Group Camping Use Statistics - collected through permit sales; and,
4. Fixed Roof Accommodation Use Statistics (Kananaskis Country) - collected through receipts.

The data collection systems associated with these types of visitation statistics are discussed in detail in the Introduction Section.

Visitation information contained herein is reported at the management unit level for Provincial Parks, Sub-Districts within Kananaskis Country, and Provincial Recreation Areas (P.R.A.'s). Appropriate user statistics for overnight and day use are included. "Area" level statistics (IE. individual campgrounds, day use areas, group use areas, fixed roof accommodation facilities), although not reported in this summary, are available upon request.

Alberta Recreation and Parks is pleased to provide for your use, the third annual "Park User Statistics - Fiscal Year Summary" report. Inquiries requiring further explanation of the methodology are welcomed, and should be directed to Barry Bentham or Roy Finzel at 427-2968.

INTRODUCTION

Implementation of the revised Park User Statistics Collection (P.U.S.C.) System, following an extensive revision study, occurred in April 1986. This report presents Park User Statistics for the period of April 1, 1988 to March 31, 1989. Information is presented for all Provincial Parks, Sub-Districts within Kananaskis Country and Provincial Recreation Areas outside of Kananaskis Country at the "management unit" level. Sub-management unit level statistics (EG. individual campground statistics) are not reported, but are available upon request.

Tables summarizing camping, day use, group use and fixed roof accommodation use statistics are included in this report. Brief descriptions of the data collection methodologies used for each category of use statistics are presented below.

Camping Statistics

It is important to note two significant changes to camping use statistics reported in this document. First, the term "Camping Party Nights" has been relabelled as "Occupied Campsite Nights". Defined since 1986 as "one site occupied for one night," it is hoped that the new label better describes the statistic being collected and reported. Second, the statistic "Accommodation Unit Nights" has been added to camping use statistics being reported (see Glossary of Terms). The addition of this figure is intended to enhance the range of descriptive statistics available to Divisional decision-makers.

Camping statistics are based primarily upon information obtained from camping permits. These permits are issued via two systems: the Standard Camping Permit and the Self-Registration Permit (envelope) systems. In the absence of permit sales (EG. some campgrounds in the off-season), reasonable estimates of camping use are provided by park staff. Information collected through these systems is summarized and transferred from the Parks to Edmonton via the Park User Statistics Summary (P.U.S.S.) sheet to record monthly camping statistics. This includes data on occupied campsite nights, turnaways, and site closures.

The Standard Camping Permit and associated periodic surveys provide information on occupied campsite nights, average camping party size and accommodation unit usage. This information enables calculation of individual camper nights and accommodation unit nights (see Glossary of Terms). Occupied campsite nights are based on the premise that a site is considered occupied when a permit has been issued and that site is occupied by the permittee and at least one camping accommodation unit. Campground turnaways are recorded each time a camping party is personally turned away because no campsites were available. This information is then recorded on monthly P.U.S.S. sheets and is presented in this report.

Self-Registration Permits also provide statistics on occupied campsite nights, but require a periodic self-registration camper survey to provide

data on camping party size and accommodation unit usage. Turnaway counts by Park staff are not always made owing to the self-administered nature of registration.

By way of a caution, it is important to note that in any self- registration system, non-compliance (IE. campers not voluntarily completing a permit and submitting money) can adversely affect the reliability of estimates of camping use. This problem is normally accounted for by compliance checks conducted by the rangers and the inclusion of non-complying occupied campsite night figures. For Provincial Recreation Areas however, where patrols cannot always be made daily, non-compliance adjustments may be low resulting in an under-estimation of camping use.

Campground occupancy data are determined from an analysis of: (1) campground capacity, (2) the number of weekday and weekend days in a specific month, (3) the number of sites affected by a closure per day, and (4) the total occupied campsite nights per month. Refer to the Glossary of Terms for the formulas used in calculating campground occupancy rates and average daily percent campground occupancies. In addition, overflow unit night figures are included in the occupancy data tables whenever appropriate.

Day Use Statistics

An evaluation of day use data collection procedures in 1981 concluded that the existing methodology was non-systematic and resulted in day use statistics which were not accurate. Consequently, a day use calibration program was instituted in the summer of 1983 and, since then, all provincial parks have been surveyed. This includes sub-districts within Kananaskis Country.

For sub-districts within Kananaskis Country and Provincial Parks, peak season day use statistics are now based on figures collected from automatic traffic counters. Adjustments to these figures include determining the ratio of day use vehicles to all other vehicles entering or exiting the park and mean party size. Both adjustment factors are obtained by a periodic (every four years) day use calibration survey. The day use calibration program involves the stopping of traffic on 20 randomly selected days during the peak season, to conduct a brief interview. Both this information and the daily vehicle counts are analyzed to yield estimates of day use visitation.

For the majority of Provincial Recreation Areas outside of Kananaskis Country, day use statistics are currently based upon the relative relationship between camping and day use (as determined from the 1982 Provincial Recreation Area Survey) multiplied by the current camping use figures. The result of these calculations represent, at best, minimum estimates of day use visitation.

It is intended that day use statistics for all Provincial Recreation Areas outside of Kananaskis Country will be based upon Automatic Traffic Counters as the primary data collection instrument (as in Provincial Parks). However, for the 1988 / 1989 Fiscal Year day use statistics for only ten

(10) of these areas are based on traffic counter readings. The methodology sees traffic counts adjusted for camper traffic (from permit sales, taking into consideration non-compliance and multiple entries and exits) and non-recreational vehicles (from records of park staff) to yield estimates of day use visitation. This approach to estimation is referred to as the Residual Method. It is hoped that the majority of Provincial Recreation Areas would be on this system beginning in 1989.

A common characteristic of reported off-season day use statistics is the arbitrary categorizing of all monthly use as weekend. In these instances it is not possible to estimate actual weekday use. Staffing does not always allow for regular reading of traffic counters on Mondays and Fridays thereby not permitting the division of reported day use statistics into weekends and weekdays.

Group Use Statistics

A standard system for collecting group camping use statistics was implemented in 1986. No prior statistics are available. Currently, the group use permit system enables collection of information pertaining to group camping unit nights, individual group camper nights, and occupancy. A survey component of the group use permit provides the average number of people in a group unit. This figure is required to calculate individual group camper nights.

Fixed Roof Accommodation Use Statistics

The addition of fixed roof accommodation statistics (IE. from Kananaskis Country) in this edition of the Fiscal Year Summary report represents a significant change to the range of visitation statistics collected and reported. Occupied room nights and people nights are derived from receipts and summarized and forwarded from the Parks to Edmonton via the Park User Statistics Summary (P.U.S.S.) sheet.

An appendix has been included in this report to complete the information requirements relevant to the reporting of Park User Statistics.

GLOSSARY OF TERMS

CAMPING

ACCOMMODATION UNIT NIGHTS: Average number of accommodation units per campsite X the number of occupied campsite nights.

AVERAGE CAMPING PARTY SIZE: Average number of people per occupied campsite. This is determined for each area by a periodic survey of camping permits.

AVERAGE DAILY (WEEKEND/ WEEKDAY/TOTAL) PERCENT CAMPGROUND OCCUPANCY:

$$\frac{\text{Total Occupied Campsite Nights For a Specified Time Period}}{\text{Sum of: (Campground Capacity Per Given Day} - \text{\# of Sites Affected by Closure Per Given Day)} \times \text{Number of Days}}$$

CAMPGROUND OCCUPANCY RATE: (REPORTED AS "NUMBER OF NIGHTS AT PERCENT OCCUPANCY")

$$\frac{\text{Occupied Campsite Nights For a Given Day}}{\text{Campground Capacity For a Given Day} - \text{Number of Sites Affected by Closure For a Given Day}} \times 100$$

Note: Sum the number of nights that report a specified range of percent occupancies.

CAMPING ACCOMMODATION UNIT: A tent, a tent trailer, a travel trailer, a motor home, a van, or a truck camper.

CAMPING PARTY SIZE: The total number of people present on an occupied site (regardless of the number of camping accommodation units occupying a site).

... continued ...

GLOSSARY OF TERMS

GROUP AREA NIGHTS AVAILABLE:	Number of Group Use Areas X Nights Per Month - Group Areas Closed Per Month X Nights Affected
GROUP AREA NIGHTS OCCUPIED:	Sum of the number of nights a group use area has been actually occupied over a specified period of time.
GROUP CAMPING UNIT NIGHT:	One camping accommodation unit in an area, designated as a group use area for one night.
INDIVIDUAL CAMPER NIGHTS:	Average camping party size X the number of occupied campsite nights.
OCCUPIED CAMPSITE NIGHT:	One site occupied for one night.
OCCUPIED CAMPSITE:	A site that is occupied by at least one camping accommodation unit.
OVERFLOW UNIT NIGHT:	One camping accommodation unit in an area designated as an overflow area for one night.
SITE NIGHTS AVAILABLE:	Capacity X Nights Per Month - Sites Closed Per Month X Nights With Closed Sites
TOTAL OCCUPIED CAMPSITE NIGHTS:	The monthly or seasonal totals of the individual daily sums of occupied campsite nights.

... continued ...

GLOSSARY OF TERMS

TURNED AWAY PARTY: A party which has been informed, by a park representative, that they cannot be accommodated on account of all available sites being occupied at a specified time.

DAY USE

AVERAGE DAY USE PARTY SIZE: Average number of people associated with a vehicle entering a provincial park or provincial recreation area for one day or portion of one day without staying overnight. This is determined by a periodic survey of day users.

DAY USE PARTY VISIT: A number of people in a vehicle entering a Provincial Park or Provincial Recreation area for one day or portion of one day without staying overnight.

NOTE: In the case of "walk-in" day users, a party is considered to be one or more individuals who appear to enter the park together.

INDIVIDUAL DAY USERS: Person(s) making a recreational visit to a Provincial Park or Provincial Recreation area for one day or portion of one day without staying overnight.

... continued ...

GLOSSARY OF TERMS

FIXED ROOF ACCOMMODATION USE

OCCUPIED ROOM NIGHT:	One room occupied for one night.
PEOPLE NIGHTS:	Average number of people per room X the number of occupied room nights.

OCCUPIED CAMPSITE NIGHTS	402799	400346	437136	451925	451948	0
GROUP UNIT NIGHTS			16855	18345	21518	17
DAY USE PARTY VISITS	N/A	N/A	1531826	1934250	2299665	

Note: - The above Occupied Campsite Night figures, prior to and including 1986, do not include Provincial Recreation use due to the incompatability of collection methodologies.

- The above Occupied Campsite Night figures include Backcountry use.

- A system to calculate Group Unit Night figures was introduced in 1986.

- The above 1988/89 Day Use Party Visit figures include off-season Kananaskis Country use but 1987/88 does not. For comparitive purposes, 1988/89 Day Use Party Visits not including off-season Kananaskis Country Use are 1,784,740. This represents a 8 percent decrease over 1987/88.

- The above 1988/89 Day Use Party Visit figures are affected by both the phased implementation of a new collection methodology based upon automatic traffic counters at many Provincial Recreation Areas and an increase in the number of areas collecting off-season day use estimates.

- The 1986 Day Use Party Visit figure does not include either Kananaskis Country or Provincial Recreation Area visitation.

- Day Use Party Visit figures prior to 1986 are not reported at the Provincial level due to the phased implementation of a new collection methodology based upon traffic counters.

DAY USE PARTY VISITS	N/A	N/A	257436	245675	329920	34

Note: - The above Occupied Campsite Night figures, prior to and including 1986, do not include Provincial Recreation use due to the incompatability of collection methodologies.

- A system to calculate Group Unit Night figures was introduced in 1986.

- The above 1988/89 Day Use Party Visit figures are affected by both the phased implementation of a new collection methodology based upon automatic traffic counters at many Provincial Recreation Areas and an increase in the number of areas collecting off-season day use estimates.

- The 1986 Day Use Party Visit figure does not include Provincial Recreation Area visitation.

N/A - Day Use Party Visit figures prior to 1986 are not reported due to the phased implementation of a new collection methodology based upon traffic counters.

	1984/85	1985/86	1986/87	1987/88	1988/89	% CHANGE FROM LAST YEAR
TYPE OF USE						
OCCUPIED CAMPSITE NIGHTS	109013	116685	130554	130811	132100	1
GROUP UNIT NIGHTS			8585	8119	9063	12
DAY USE PARTY VISITS	N/A	N/A	N/A	273275	514925	

Note: - The above Occupied Campsite Night figures include Backcountry use.

- A system to calculate Group Unit Night figures was introduced in 1986.

- The above 1988/89 Day Use Party Visit figures include off-season use (with the exception of Peter Lougheed Provincial Park) but 1987/88 does not. For comparitive purposes, peak season Day Party Visits are 262,800. This represents a 4 percent decrease over 1987/88.

N/A - Day Use Party Visit figures prior to 1987 are not reported due to the phased implementation of a new collection methodology based upon traffic counters.

DAY USE PARTY VISITS	N/A	N/A	148256	153195	164265	7

Note: - The above Occupied Campsite Night figures, prior to and including 1986, do not include Provincial Recreation use due to the incompatability of collection methodologies.

- A system to calculate Group Unit Night figures was introduced in 1986.

- The above 1988/89 Day Use Party Visit figures are affected by both the phased implementation of a new collection methodology based upon automatic traffic counters at many Provincial Recreation Areas and an increase in the number of areas collecting off-season day use estimates.

- The 1986 Day Use Party Visit figure does not include Provincial Recreation Area visitation.

N/A - Day Use Party Visit figures prior to 1986 are not reported due to the phased implementation of a new collection methodology based upon traffic counters.

GROUP UNIT NIGHTS			2903	3286	3539	8
DAY USE PARTY VISITS	N/A	N/A	368643	390435	395200	1

Note: - The above Occupied Campsite Night figures, prior to and including 1986, do not include Provincial Recreation use due to the incompatability of collection methodologies.

- A system to calculate Group Unit Night figures was introduced in 1986.

- The above 1988/89 Day Use Party Visit figures are affected by both the phased implementation of a new collection methodology based upon automatic traffic counters at many Provincial Recreation Areas and an increase in the number of areas collecting off-season day use estimates.

- The 1986 Day Use Party Visit figure does not include Provincial Recreation Area visitation.

N/A - Day Use Party Visit figures prior to 1986 are not reported due to the phased implementation of a new collection methodology based upon traffic counters.

GROUP UNIT NIGHTS			1772	2165	3124	44
DAY USE PARTY VISITS	N/A	N/A	757491	871670	895355	3

Note: - The above Occupied Campsite Night figures, prior to and including 1986, do not include Provincial Recreation use due to the incompatability of collection methodologies.

- A system to calculate Group Unit Night figures was introduced in 1986.

- The above 1988/89 Day Use Party Visit figures are affected by both the phased implementation of a new collection methodology based upon automatic traffic counters at many Provincial Recreation Areas and an increase in the number of areas collecting off-season day use estimates.

- The 1986 Day Use Party Visit figure does not include Provincial Recreation Area visitation.

N/A - Day Use Party Visit figures prior to 1986 are not reported due to the phased implementation of a new collection methodology based upon traffic counters.

EXPLANATION OF SYMBOLS
- • - Rank order of management units is based on individual day users.
- S.D. - Sub-District
- P.R.A. - Provincial Recreation Areas

Notes: - Refer to individual park tables in text for factors influencing use.

- Day use statistics for several areas (i.e., Twelve Foot Davis, Hoodoos, Horseshoe Canyon and Calhoun Bay) are not available and are therefore not included in the above table.

ADDENDUM

(Provincial Recreation Areas)

For the Provincial Recreation Areas, (P.R.A's.) listed below, comparisons between Day Use Party Visits for the 1987/88 and 1988/89 Fiscal Years are not meaningful as presented:

Nojack	The Narrows
McKenzie Crossing	Assineau River
Dunvegan	Beaver Lake
Bonnie Lake	Eastbourne
English Bay	Ethel Lake
Floating Stone Lake	Fork Lake
Franchere Bay	Frenchman's Bay
Kehewin	Lower Mann Lake
Mallaig	Manetokan
Moore Lake East	Moore Lake West
Muriel Lake	North Buck Lake
Plamondon	Vezeau Beach

1987/88 Day Use Party Visit figures for the above P.R.A's. are not comparable to the 1988/1989 figures owing to a change in the collection methodology used. During 1988/1989 there was a move to base Day Use Party Visit figures upon automatic traffic counter readings, adjusted for non-recreational vehicles and camping traffic.

(page 18)

The reported Provincial Group Camping Use table is in error (IE. off season individual camper nights) and should be replaced with the following:

	GROUP UNIT NIGHTS			INDIVIDUAL	OCCUPANCY	
	WEEKDAYS	WEEKENDS	TOTAL	CAMPER NIGHTS	AREA NITES AVAILABLE	AREA NITES OCCUPIED
MONTH						
APRIL	64	346	410	1320	918	50
